

Multimedia center functions

TW-ONE allows the playback of multimedia contents stored on the mass storage devices connected to it or through your home network. With the DLNA compatibility its possible to share multimedia contents, such as pictures, music and videos, between devices through the LAN connection.

Internet connection

TW-UNO converts your TV into a SMART TV and allows easy access to the main social networks, youtube, etc.. through a dedicated MMH portal (Netrange). With the integrated browser you can navigate the web just by simply entering the desired address using the virtual keyboard.

3D Content

When TW-UNO is connected to a 3D-Ready TV, it allows you to view 3D formats like 3D Tile format, side by side and top-bottom with an automatic recognition of them.

Product description

TeleWeb Uno (TW-UNO) is a new way of conceiving television, the relationship with video entertainment, the access to multimedia content on your home network and internet browsing.

OFFERS both SD (standard definition) and HD (high definition) television using the integrated digital terrestrial receiver.

ALLOWS the personal video recording (PVR) of your favorite programs on storage devices connected and/or into the internal hard disk (if included).

RECOGNIZES and processes 3D signals in the main formats and in the exclusive 3D Tile format.

PLAYS and shows video, music or pictures on storage devices connected, or on your home network, and is able to organize media libraries.

TURNS your television into a modern SMART TV to access to the main social networks, YouTube, Internet radio, etc. or to navigate through the integrated browser.

TW-UNO features

- Tuning and viewing the digital terrestrial channels in HD “free to air”
- Video resolution up to 1080p/50, 60 Hz
- Recording digital TV channels in full HD 1080p
- Set date, time and channel for the personal video recording (PVR)
- Recognition and reproduction of 3D formats: Tile Format, Side by Side, Top Bottom
- TIMESHIFT function allows you to view a recorded program whenever you like
- Display almost any type of video formats
- Playing almost any type of audio formats
- Show picture in the most common formats
- Easy access to the main social networks through a dedicated MMH TV portal (Netrange) or by using the integrated browser
- Compatible UPnP (Universal Plug & Play)
- File management between devices connected such as HDD and Flash Drives
- Parental lock protected by customized password
- Internet & Network connection through LAN and/or Wireless
- DLNA compatible
- Remote firmware update

Functions

- **TDVB-T SD/HD:** With TW-UNO it is possible to view both SD and HD television content using the internal digital receiver.
- **PVR (Personal Video Recorder):** The TW-UNO records digital terrestrial TV channels in both SD and HD definition onto storage devices connected via SATA or USB and/or into the internal HDD (if included).
- **TIMESHIFT function and recording schedule:** The PVR is characterized by time shifting function which allows you to choose when to watch a particular program, regardless of the network operator's TV schedules. During recording it is also possible to pause a program or to replay interesting scenes.
- **EPG function (Electronic Program Guide):** The EPG displays the title of the program, the start/end time and all scheduling information for upcoming programs (linked to the broadcasters availability)
- **LCN (Logical Channel Number):** The LCN feature allow the TV channels to be automatically sorted in a specific order within the channel list.
